

Universal-Batch-Treater

Type: NIKKI

Description

- High-quality treatment of all seed types using the rotor / stator principle
- Flexible Treater, coating and pelleting processes
- Perfect degree of treatment thanks to batch treatment technology
- Particularly suitable for seed breeding and application trials
- Perfect treatment result from 50 ml - 2000 ml seed content
- Optimum grain-to-grain distribution
- Homogeneous grain coating
- Seed protection through air cushioning during treatment operation
- Fully visible outlet channel with excellent cleaning openings
- Spring-loaded discharge flap with one-hand operation
- Transportable and can be used anywhere (230 V and compressed air connection required)

Functions

- Mixing cylinder with special mixing blades
- Infinitely variable speed adjustment of the mixing cone
- Spray disk for fine spraying of the liquids (without nozzles)
- Treatment insertion by means of syringe, dispensette or peristaltic pump
- Very simple operation via manual switches
- Various discharge funnels, the right funnel for every bag
- Openings in the lid for aspiration and manual addition of treatment

Optional:

- Storage container for seeds (approx. 1500 ml capacity or according to customer requirements) with bottom flap
 - Laboratory peristaltic pump for standardized treatment processes
 - Completely closed mixing blades
